

Annual Conference 2007

Monday / 22nd of October
Austria Center Vienna / Austria
Bruno-Kreisky-Platz 1
A-1220 Wien

Joint EuroRec – EHTEL Workshop (WHIT 2007 PreConference)

"High Quality EHRs: A Challenge for Cooperation in Health"

Welcome to the first Joint EuroRec -
EHTEL 2007 Workshop:

"High Quality EHRs: A Challenge for Cooperation in Health"

(workshop programme: see overleaf)

Increased collaboration amongst health
professionals is crucial for the transformation of
healthcare.

The complex design and implementation of high
quality Electronic Health Record systems (EHRs)
necessitate strong cooperation between all the
stakeholders (e.g. policy makers, clinicians and
industry). As a result of this joint conference,
EuroRec and EHTEL will issue joint
recommendations.

This workshop will run alongside "The World of
Health IT 2007 Conference & Exhibition"
(WHIT 2007).

The WHIT 2007 conference programme has
been approved by the EACCME for Continuing
Medical Education (CME) (up to 15 Education
Units).

This EuroRec - EHTEL workshop is
FREE but delegates
MUST REGISTER
electronically beforehand via

www.eurorec.org/eurorec2007/registration.cfm

Registration will enable us to cater for lunch: an
excellent opportunity to network (offered by the
EuroRec and EHTEL sponsors).

This will be an event for all, so start and maximise
your meetings in Vienna with this conference.
We look forward to welcoming and seeing you at
this inspiring and thought-provoking event!

On behalf of the EuroRec Board,

Prof. Dr. Georges De Moor, President.

Organised by

EuroRec 2007 Annual Conference Programme

Monday / 22nd of October / 2007
Austria Center Vienna / Austria

| 10:30h - 12:15h
