

The cLead system

The WHIT cLead System is a fast and easy way to record visitors' contact information. By simply scanning a visitor's name tag (badge) with the supplied scanner, that contact is entered into your own visitor database, including all relevant product information or comments which have been added to these visitors' profiles beforehand. Following the event, approved visitors' address data can be provided in printed form or as a MS Excel file, or made available with proper access rights through an online platform.

- 1. Order**

To guarantee the availability as well as the lower rate prior to the deadline, please order the required number of scanners as soon as convenient possible.

- 2. Order confirmation**

After receipt of your order we will confirm the receipt and invoice & charge amount due.

- 3. Configuration**

Prior to the event you will receive a link and a password for accessing our online database. There you can check the edited names of products to be displayed on the handhelds and download the data after the event.

- 4. Lead capture**

Onsite, you can pick up your scanner at the lead system service desk. Our trained staff will be available to answer your questions during the opening hours of the event. Every evening or at the end of the event when returning the scanner, the collected data is synchronized from your scanner to the cLead server.

- 5. Data provision**

As soon as the data stored on the scanner is synchronized with the database you can access, check or download your collected address data in the online database

Scan Options

- **Quick scan**
The visitor is effortlessly saved into your individual database.
- **Scan and add details**
The visitor is effortlessly saved into your individual database. Additionally, comments and products can be added which that visitor is interested in.

Scanning

The PDA handheld lead system guarantees maximum flexibility and freedom of movement in the booth. The ready to use PDA package will include the scanner, an extra strong battery pack and a charging unit.

- After log in (log in data are provided with the handheld) the interface for scan is displayed
- To scan a visitor the scan button has to be hit (left side of the device) and the handheld confirms the scan
- After scanning a person you can choose from
 - scanning a new visitor (just press the scan button again) or
 - add products of interest to this visitor or
 - add a comment to the visitor
